Pediatric Hematology/Oncology International Programs

Chatchawin Assanasen MD
Director, UT Southeast Asian Pediatric Hematology/Oncology Program
Associate Professor, Pediatric Hematology/Oncology

Global Health: A Broad Definition

Why Vietnam?

1. Opportunities to Make Huge Impacts for the Children
2. Overwhelmed Staff and Infrastructure
3. Large Number of Children with Heavy Burden of Diseases
4. Misconception of "Hopeless Terminal Illness"
5. Lack of Clinical Data and Research
6. New Specialty with Limited Standards and Mentorship
7. Groups of Motivated, Talented Physicians and Nurses
8. Inclusive International Network and Community with Proven Models and Experience
9. Establishment of Collaborative Groups and Cancer Registry
10. Awareness and Support from the Local Community and Government
